## Postcode

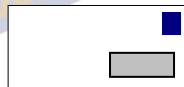

### Postcode type and position

5 digits to the right of the locality name.

## Position of the address on the envelope

Bottom right-hand corner

## Alignment of address lines

Left-aligned

## Administrative divisions

Indonesian addresses use four levels of localities. The localities and sub-localities used the addresses refer in majority of cases to the administrative divisions of the country as follows:

	Admin level	English	Indonesian
Not used in address	1	Province	Provinsi
Locality	2	City/Regency	Kabupaten/Kota
Sub-locality (sub-loc)	3	District	Kecamatan
Sub-locality (sub-loc 2)	4	Village	Desa/Kelurahan
Sub-locality (sub-loc 3)	5	RT/RW	Rukun Tetangga / Rukun Warga

Jakarta is a special case of a locality because it is an administrative division of level 1 called Province (*Provinsi*).

The acronym RT/RW stands for Rukun Tetangga / Rukun Warga. In address only 'RT' followed with two numbers separated with slash (ex. RT 01/001) is used. This is to identify areas of neighborhood groups/citizen groups that do not have administrative power but were created to support administrative functions of sub-districts.

## Examples

### Urban area delivery

Ibu Wisynuprpto  
Jl. Ciburial Indah No. 47  
BANDUNG 40198  
INDONESIA

*with dependent street*
